ST PETER'S HEALTH PARTNERS

## **PACE Day Center Services**

The PACE Day Center is an important part of Eddy SeniorCare PACE and serves as a central location where many services are provided.

At the Day Center, participants may:

- See members of their healthcare team
- Receive medical and nursing services
- Participate in physical, occupational, or other therapies
  - Meet with social services staff
- Enjoy meals and social or recreational activities

Day Center attendance is based on each participant's individual care needs and is determined by the Interdisciplinary Team. Some participants attend the Day Center regularly, while others attend less frequently or as needed.

Transportation to and from the Day Center is provided as part of the PACE program when Day Center services are included in the participant's care plan.
