ROBOTICS 360°

A SEAMLESS CARE JOURNEY FOR YOUR PATIENTS.

RANKED TOP 1% BY VOLUME NATIONWIDE

WORLD-CLASS ROBOTICS

With over 27,000 robotic procedures performed, St. Peter's Health Partners is leading the way in robotic surgery. Our experience translates to better outcomes for your patients.

Exceeding National Standards

LOS*

OR Time†

GENERAL SURGERY

GYNECOLOGY

UROLOGY

GYN-ONC

Our surgical outcomes not only meet expectations — but also exceed the national standards. Patients experience quicker recoveries with shorter hospital stays for general surgery, gynecology and urology. And with seven advanced robotic systems, we're able to treat more patients, offering unmatched scheduling flexibility in the region.

THE LATEST TECHNOLOGY: THE DA VINCI 5

St. Peter's Health Partners is the only hospital system in the region using the Da Vinci 5 (DV5).

According to Intuitive, the DV5 — the most advanced robotic surgery system — uses up to 43% less tissue pressure, minimizing trauma and delivering enhanced precision for better outcomes.

BENEFITS OF MINIMALLY INVASIVE SURGERY (MIS)

LESS
INVASIVE

When robotic surgery isn't an option, patients still benefit from our board-certified, fellowship-trained surgeons — experts in the latest endoscopic, laparoscopic and interventional radiology techniques.

Watch Dr. Barbara Brazis, Chief of Robotic and General Surgery, discuss high-tech robotic surgery with President and CEO, Dr. Steven Hanks.
